I. CHEMICAL PRODUCT IDENTIFICATION

Product Name : **SMP 203A Primer Filler Activator**

Date Printed : 10/04/06

Revision Number : 2

Revision Date : 06/21/06

Supersedes : 06/21/06

II. COMPOSITION/INFORMATION ON INGREDIENTS - (EXPOSURE LIMITS - SEE SECTION VIII)

INGREDIENT NAME	CAS #	%
Isopropanol	67-63-0	40.01 - 50.00
Isobutyl alcohol	78-83-1	30.01 - 40.00
4-Hydroxy-4-methyl-2-pentanone	123-42-2	10.01 - 15.00
Methoxypropanol acetate	108-65-6	10.01 - 15.00
Phosphoric acid	7664-38-2	1.01 - 5.00

If ingredient percentages do not total 100%, the balance is due to rounding or applies to ingredient(s) deemed nonhazardous under 29 CFR 1910.1200 (Hazard Communication Standard).

III. HAZARDS IDENTIFICATION

	HMIS
HEALTH	3
FLAMMABILITY	3
REACTIVITY	1

0 = Least 1 = Slight 2 = Moderate 3 = High 4 = Extreme * = Chronic Health Effects

Routes of Entry:

Eye contact, Skin contact, Inhalation, Absorption, Ingestion.

Medical Conditions Aggravated:

Skin disease including eczema and sensitization, Eye disease, Respiratory disease including asthma and bronchitis, Liver disease.

Immediate (Acute) Health Effects:

Inhalation:

Can be corrosive to the respiratory tract causing severe irritation and tissue damage.

Skin Contact:

Corrosive to skin tissue. Can cause chemical burns.

Eye Contact:

Corrosive to eye tissue. Can cause severe irritation, tearing, and burns that can quickly lead to permanent injury including blindness.

Skin Absorption:

Harmful if absorbed through the skin. May cause severe irritation and systemic damage.

Ingestion:

Harmful if swallowed. May cause systemic poisoning. Corrosive to tissue. Can cause severe and permanent damage to mouth, throat, stomach. Aspiration may lead to lung damage.

Hazardous Combustion Products:

Toxic fumes, Toxic gases, Carbon dioxide, Carbon monoxide.

VI. ACCIDENTAL RELEASE MEASURES

Health Consideration for Spill Response:

Exposure to the spilled material may be severely irritating or toxic. Follow personal protective equipment recommendations found in Section VIII of this MSDS. Personal protective equipment needs must be evaluated based on information provided on this sheet and the special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred, and the expertise of employees in the area responding to the spill. Never exceed any occupational exposure limits. Evaporation of volatile substances can lead to the displacement of air creating an environment that can cause asphyxiation. Persons not wearing appropriate protective equipment should be excluded from area of spill until clean-up has been completed.

Spill Mitigation Procedures:

General Methods:

Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section VIII at a minimum. For liquid spills, dike with suitable absorbent material like granulated clay. Gather and store in a sealed container pending a waste disposal evaluation. Shut off ignition sources; including electrical equipment and flames. Do not allow smoking in the area.

Air Release:

Ventilate the area by opening door and/or turning on fans and blowers.

Water Release:

Do not flush to sewer.

Land Spills:

Avoid runoff into storm sewers and ditches that lead to waterways.

VII. HANDLING AND STORAGE

Handling:

Harmful or irritating; avoid overexposure to the material. Use only in a well ventilated area. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Use spark-proof tools and explosion-proof equipment. Do not get in eyes, on skin and clothing. Avoid breathing material. Use non-sparking tools when opening or closing containers. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Ground and bond containers when transferring material. Keep in air-tight containers- material is hygroscopic. Remove contaminated clothing and wash before reuse.

Storage:

Store in a cool dry ventilated location. Isolate from incompatible materials and conditions. Keep container(s) closed. Keep away from sources of ignition. Store in a cool dry place. Store in a tightly closed container.

VIII. ENGINEERING CONTROLS, PERSONAL PROTECTIVE EQUIPMENT, AND EXPOSURE LIMITS

Engineering Controls:

Local exhaust ventilation, process enclosures, or other engineering controls are important when handling or using this product to avoid overexposure. Engineering controls must be designed to meet any relevant OSHA chemical specific standards in 29 CFR 1910. Facilities storing or using this material should be equipped with an eyewash and safety shower. Explosion proof exhaust ventilation should be used.

Protective Equipment:

Respiratory Tract:

Use respirators only if ventilation cannot be used to eliminate symptoms or reduce the exposure to below acceptable levels. A supplied air type respirator will be required. If a respirator is warranted, follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements. A supplied air type respiratory will be required. A supplied air type respirator may be required.

Eyes:

Wear chemical splash goggles when handling this product. Additionally, wear a face shield when the possibility of splashing of liquid exists. Do not wear contact lenses. Have an eye wash station available.

Skin:

Avoid skin contact by wearing chemically resistant gloves, an apron and other protective equipment depending upon conditions of use. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work.

Protective Clothing:

Wear chemically resistant gloves and apron. (Consult your safety equipment supplier).

CHEMICAL NAME	CAS #	ACGIH TLV	OSHA PEL	IDLH
Isopropanol	67-63-0	(400) ppm TWA; (983) mg/m3 TWA 500 ppm STEL	400 ppm TWA; 980 mg/m3 TWA	2000 ppm IDLH
Isobutyl alcohol	78-83-1	50 ppm TWA	100 ppm TWA; 300 mg/m3 TWA	1600 ppm IDLH

TSCA Inventory : All components of this product are listed in, or exempt from, the TSCA 8(b) Inventory.

M.S.D.S. Reportable HAP(s) : This product contains no HAP chemicals at or above de minimis values..

SARA/CERCLA Section 302 : N/A
